

Rooting for Change

Exploring Root Systems, Soil Health, and Foliar Fertility

Join us for an insightful field day led by **Joel Williams of Integrated Soil**, a renowned expert in soil health and plant nutrition.

What to Expect

This event will highlight our sown tropical pastures, mixed species blends, and kikuyu-based pastures.

We will look at the soil profile and root architecture using soil pits and explore tailored foliar fertilising our pastures.

Key Topics

- **Explore Root Systems:** Understand the architecture and soil interaction of various pasture species.
- **Soil Health:** Identify and troubleshoot soil constraints affecting plant performance.
- **Foliar Fertility:** Learn about foliar fertiliser use based on tissue testing and measure short-term responses.

VACY/GRESFORD: 22 September 2025, 9am – 1pm

GLOUCESTER: 23 September 2025, 12pm – 4pm
